

BERETTA UNVEILS THE VICTRIX ARMAMENTS “CORVUS” HEAVY SNIPER RIFLE AT THE 2017 DSEi SHOW

*London, September 12th, 2017, Beretta unveiled at the 2017 DSEi Show
the new Victrix Armaments “Corvus” heavy sniper .50 calibre rifle*

Beretta is proud to announce Victrix Armaments’ latest development in long range bolt action rifles: the .50 BMG calibre CORVUS. The recently acquired Italian brand Victrix expands the already broad range of precision rifles marketed by Beretta with a true “hard hitting” sniper and anti-materiel rifle for extreme long range engagements. The heavy calibre CORVUS rifle is manufactured with the same cutting edge technology, high end materials and unparalleled precision that defines the Company production but in a highly effective and widely adopted calibre. Despite the technical challenges imposed by the powerful .50 BMG, the CORVUS is one of the most accurate, light and compact rifle in its category.

With a smooth and at the same time rock-solid AISI 630 stainless steel action with 3-lug bolt, together with a 27” barrel with a 4 chamber recoil dampening muzzle brake, the CORVUS provides an astonishing 0.5 MOA accuracy at 1,094 yards in a 33.11 pounds, 45.4” (folded stock) package. Complemented by several ergonomics and new safety features, the CORVUS is ready for any challenging combat environment.

Victrix Armaments is an Italian company based in Cazzano Sant’Andrea (Bergamo) based within Officina Meccanica Rottigni which offers leading edge solutions in the field of precision bolt action rifles and related technologies. With Victrix, Beretta broadens its strong position in the rifle segment and further expands its already wide range of products and customer base. Beretta will market the Victrix product lines - Victoria (Competition), and Minerva (Defense & Law Enforcement) - and will develop new solutions starting from a line of extreme long range rifles in .408/.375 CheyTac, as well as .50 BMG calibers. These products will complement and expand the fine line of Sako and Tikka rifles already marketed by Beretta.

Beretta Defense Technologies is an alliance of four market leading companies: Beretta, Benelli, Sako and Steiner. These founding companies of Beretta Defense Technologies have been globally well known through decades of leadership, innovation and investment and now form a single source contact for the high tech military & law enforcement hardware they are renowned for.

Beretta Defense Technologies is a concept that has grown from the needs of governments and agencies to cover a wide range of complicated scenarios, by providing with the unique combination of services, weaponry and equipment – from firearms, ammunition, optonics to tactical clothing – in order to match every operational needs.
