

DBAL-PL

Dual Beam Aiming Laser Pistol Light

STEINER **Shown in black****Shown in black**

The DBAL-PL enables operators to engage targets on the battlefield or during close quarter combat in both light and no light conditions. The DBAL-PL functions in two operational modes: The visible switch activates the visible laser and 400 lumen white light LED; while the IR switch pairs a Class 1 IR laser with an eye-safe IR LED illuminator for supplemental illumination. New temperature insensitive green laser technology provides better visibility and greater stability over a wide-range of temperatures.
