

T1042 Tactical Binocular

STEINER 

T1042 Tactical 10x42 Binocular

SUMR Milliradian Ranging Reticle

Lines, numbers and indicators are designed to be easily readable in daylight as well as in artificial light. The reticle is adjusted parallax free to infinity and is built into the right half of the binocular.

The Steiner Optics reputation for combat-worthy performance, toughness and dependability was earned the hard way: in battlefield and tac ops situations around the world. These tactical binoculars reflect hard-won experience with features, ergonomics and visual excellence that are unsurpassed anywhere, and rugged reliability that can survive anything. Whether you need a pocket-sized compact for your gear bag or a full-sized model to spot for your shooter, the Tactical Series will serve you well.

10x power and bright image perfect for sniper/spotters, border surveillance, patrol car optics, and tactical ops whether day or night.

T1042r features the SUMR targeting reticle system, for a small, light binocular in a power to match newer 10x rifle scopes.
